Brand New Book ***** Print on Demand *****.Excerpt from The Industrial Arts in the Public Schools, 1877: Report of the Committee on Education, Made We are satisfied, however, that such a strict construction of the resolution was not intended, and that the subject referred to us, embraced expenditures for, and instruction in all the public schools, whether under state or municipal patronage. This view of the general scope of the resolution offers us four special topics for consideration, which, taken in their order, appear to be, 1st. The proper limit of free education. 2d. The importance of the High School in the system. 3d. The variety and kind of instruction in the schools. 4th. Industrial Art education. The Proper Limit Of Free Education. The fundamental principle underlying our public school system is, that the safety of the state depends upon the education of all its people; and although this principle is universally recognized, there exist differences of opinion as to the precise amount of education the state should furnish.
